2025 WESTERN REGION BURN CONFERENCE

Burn centers from across the West Coast met in our backyard here in Seattle to share research and build partnerships. Thank you to the Arizona Burn Foundation for putting this meeting together!

RETURN TO SCHOOL: MSKTC HOT TOPIC

Visit:

<https://msktc.org/burn/videos/returning-school-after-burn-injury>

MSKTC recently released a new Hot Topics video education series about returning to school after burn injury. They state that "going back to school is a very important step in a child's healing after a burn injury. Learning and being with friends is important to your child's progress."

Check out the QR code to see the video series with stories from burn care providers and a person living with burn injury.

On the back:
Welcome, Joe!,
Congrats Albert!,
The PREEVENT Trial

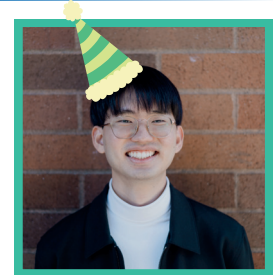

WELCOME, JOE, BURN RESEARCH STUDY ASSISTANT!

Joseph (Joe) Grobowski earned his Bachelor's in Biochemistry from UW, with minors in Philosophy and Chemistry. His research interests focus on the interdisciplinary nature of medicine, particularly in how medical research can bridge principles of basic and clinical science with the broader contextual frameworks provided by disciplines such as anthropology and philosophy. Guided by this integrative perspective, he seeks not only to practice medicine but also to advance the field in ways that ensure accessibility and equity for all.

CONGRATULATIONS, ALBERT!

Albert, one of our research assistants, started medical school at Wayne State University School of Medicine in the class of 2025! He is excited to take this next step in his journey. Though he was sad to leave, he is grateful for the experiences and support he's had at NWRBMS and looks forward to the path ahead.
